Objective: Aspiring Software Development Engineer with strong foundations in programming, problem-solving, and full-stack development. Seeking an opportunity to apply my skills in building scalable applications and contribute to innovative software solutions while continuously enhancing my technical expertise

Education: B .Tech in Information Technology , Majors in Artificial intelligence and Machine Learning | Sanjivani College of Engineering, Kopargaon, India | CGPA 9.36/10 (2024 –Present)

Diploma in Computer Technology, Sanjivani K.B.P Polytechnic, Kopargaon | Grade: 90.17%

Projects:

JARVIS – AI-Based Desktop Voice Assistant: Developed a Python-based intelligent voice assistant to perform automated desktop tasks using speech commands.

Implemented speech recognition and text-to-speech functionality using speech_recognition and pyttsx3

Integrated modules such as os, datetime, wikipedia, and webbrowser to enable application launching, web searches, music playback, and email automation.

Designed the system to improve user interaction, productivity, and accessibility through voice-controlled operations.

Published a research paper based on the system architecture and implementation.

Tech Stack: Python, pyttsx3, speech_recognition, OS Module, DateTime, Wikipedia API, Webbrowser

GlamUpBySakshi – Makeup Studio Website: A responsive portfolio website designed for a professional makeup studio to showcase bridal and engagement looks, service offerings, and customer engagement through an interactive web interface. Designed and developed a modern, visually appealing, and fully responsive multi-page website for a makeup studio using HTML, CSS, JavaScript, and React.

- Implemented interactive image galleries and integrated social media links (Instagram & YouTube) with location-and-contact features to enhance client engagement and brand visibility.

- Deployed the website using Netlify app with optimized load performance and basic SEO improvements to increase online reach and accessibility

Tech Stack: HTML, CSS, JavaScript, React, Netlify

NPK Soil Nutrient Analysis System (IoT-Based)

Designed and developed an IoT-based soil monitoring system using Arduino Uno to measure key soil nutrients including Nitrogen (N), Phosphorus (P), and Potassium (K).

Integrated multiple sensors for real-time data acquisition and implemented serial communication for continuous monitoring.

Processed and analyzed collected sensor data to determine soil fertility levels and nutrient deficiencies.

Developed logic to classify soil conditions and provide data-driven fertilizer recommendations to improve crop productivity.

Focused on improving agricultural decision-making through automation, accuracy, and real-time monitoring.

Tested system performance under different environmental conditions to ensure reliability and consistency.

Tech Stack: Arduino Uno, Sensors, Embedded C, Python ,Serial Communication

Internship :

BeyondDegree Consultancy Pvt. Ltd, Pune

June 2024 – July 2024

Completed a structured internship on Machine Learning with Python, where I worked on analyzing real-world datasets, performed data preprocessing and visualization, and implemented supervised learning models such as Linear Regression and Random Forest using NumPy, Pandas, and Scikit-learn.

Techking Solution India

April 2022 – June 2022

Completed an internship focused on front-end web development, where I learned the fundamentals of Python, HTML, and CSS, and contributed to developing responsive and user-friendly web interfaces to enhance overall UI/UX design.

Technical Skills & Soft Skills :

Technical Skills:

Programming Languages : Python, C,C++, Java, HTML, CSS,React

Database Management: MySQL, MongoDB

Data Visualization Tools: Power Bi, Tableau

More: Computer Networks, Operating System , IoT

Soft Skills: Analytical thinking, Adaptability, Team Collaboration, Research Mindset, Growth Orientation

Certifications:

- Machine Learning using Python, SimpliLearn
- E-Business, NPTEL
- Java Programming, Udemy
- Full Stack Development, Udemy
